

## Environmental Policy

The management and all who work at Precision Colour Printing are committed to the environment and the prevention of pollution.

The organisation ensures that all its activities are carried out in conformance with the relevant legislation.

The organisation seeks to minimise waste arising, promote recycling, reduce energy consumption, reduce harmful emissions and, where possible, to work with suppliers who themselves have sound environmental policies.

An essential feature of the environmental management system is a commitment to improving environmental performance. This is achieved by setting environmental objectives and targets which are regularly monitored and reviewed. These objectives and targets are publicised throughout the organisation and all staff are committed to their achievement.

In order to ensure the achievement of the above commitments, the organisation has implemented an environmental management system which satisfies the requirements of ISO 14001:2015 and is certified by a UKAS accredited body to this standard.
